Education

Savitribai Phule Pune University <i>Master in Computer Applications</i>	June 2022 – June 2024 <i>Pune, Maharashtra</i>
---	--

Fergusson College <i>Bachelor of Science in Computer Science</i>	June 2019 – June 2022 <i>Pune, Maharashtra</i>
--	--

Relevant Coursework

- | | | | |
|------------------------|-----------------------|---------------------------|-------------------------|
| • Data Structures | • Algorithms Analysis | • Artificial Intelligence | • Systems Programming |
| • Software Methodology | • Database Management | • Internet Technology | • Computer Architecture |

Experience

Quintel Research Solutions <i>Data Research Analyst</i>	Feb 2025 – Present <i>Remote</i>
---	--

- Conducted in-depth secondary research on 50+ companies monthly to provide strategic insights using Excel, SQL, and Python.
- Improved data collection efficiency by 20% through optimized research methodologies.
- Managed data sets with 100,000+ data points, ensuring 99% data integrity.
- Gathered and analyzed data from credible sources to support business decision-making through advanced data processing techniques.
- Staying updated on industry trends and market developments to improve research accuracy.
- Collaborated with team members to refine research methodologies and improve data collection processes using automation techniques in Python.

Technical Skills

- * **Programming Languages** :C, C++, Java, Python, HTML, CSS
- * **Libraries/Frameworks**: JavaScript, React, jQuery, Tailwind CSS, Bootstrap
- * **Tools / Platforms**: Git, VS Code, RESTful APIs, Linux/Unix, Excel
- * **Databases**: PostgreSQL, MySQL, MongoDB

Projects

SQL Data Warehouse and Analytics Solution | *SQL Server, T-SQL, ETL Pipelines, Data Warehousing, SSMS*

- * Built ETL pipelines to extract, transform, and load data from multiple source systems (ERP and CRM CSV datasets) into a centralized data warehouse.
- * Designed scalable data architecture using Bronze (raw), Silver (cleaned), and Gold (analytics-ready) layers.
- * Performed data cleansing, normalization, and integration to ensure data quality and consistency.
- * Documented architecture, data models, and workflows to support stakeholders and analytics teams.

End-to-End Data Analytics | *Python, SQL, Kaggle API*

- * Developed a data pipeline to process, clean, and analyze data from Kaggle.
- * Automated dataset retrieval using Kaggle API and performed data cleaning with Pandas
- * Loaded cleaned data into SQL Server and created optimized queries for insights.

AI-Powered PDF Query System | *JavaScript / TypeScript, Node.js, Vector Databases, LLM APIs, Inngest, REST APIs*

- * Built a complete pipeline to ingest, process, and query PDF documents using LLM-based semantic search.
- * Integrated a vector database to enable fast similarity search and context retrieval.
- * Developed API services to handle document ingestion and query processing workflows and configured event-driven background jobs using Inngest for scalable and asynchronous processing
- * Optimized query responses using retrieval-augmented generation (RAG) techniques.
- * Implemented rate limiting, throttling, and concurrency controls to ensure system stability and performance.

Certifications

- * Software Engineering Virtual Experience Program – Forage
